Summary

Highly motivated Full-Stack developer with two years of experience in designing, developing, and maintaining web applications. Proficient in both frontend and backend technologies, with a strong focus on creating efficient and scalable solutions. A fast learner who is passionate about teamwork and adheres to the SOLID principles to ensure robust and maintainable code.

Skills

Languages:	Java, JavaScript, TypeScript, Python, R, Solidity, C
Frontend:	HTML, CSS, React.js, Next.js, Vue.js, Bootstrap, Vite
Backend:	Node.js, Spring Boot, Express.js, GraphQL, Nest.js
Databases:	MySQL, PostgreSQL, MongoDB, QGIS, Tableau
Testing:	Jest, JUnit, TDD, BDD, Unit Test, Integration Test
Tools:	Docker, Git, Postman, Jira, Trello, Confluence, Slack
Cloud Services:	AWS: RDS, EC2, S3, CloudFront, Route 53, Load Balancer
Other:	REST APIs, Agile, CI/CD, OAuth, Data Visualisation

Professional Experience

Full Stack Developer, BeeQuant AI

Melbourne, VIC, Australia

Mar 2024 – Present

- **Role:** Worked as full stack developer, contributing to the development of a crypto trading bot platform with a robust and intuitive interface for automated cryptocurrency trading.
- **Frontend Development:** Utilised React and Next.js in TypeScript to build a responsive, user-friendly frontend, enhancing the platform's performance and user experience.
- **Backend Development:** Developed API services using NestJS and GraphQL to efficiently handle data operations and business logic, ensuring seamless interaction with the PostgreSQL database configured with Docker for high performance and scalability.
- **Authentication & Security:** Implemented login and password update functionalities with JWT for secure session management and bcrypt for password hashing. Integrated Google and Facebook OAuth authentication using custom AuthGuards, Passport.js, and strategy configuration in NestJS.
- **Testing & Validation:** Wrote unit tests for the frontend using Jest for Test-Driven Development (TDD), and spec tests for the backend using Jest for Behaviour-Driven Development (BDD). Implemented Joi validation schemas to enforce strong password policies.
- **Team Collaboration:** Collaborated closely with business analysis and DevOps teams to align development efforts with business requirements and ensure seamless deployment and scalability of the platform.

Data Scientist Intern, Dunnhumby

Shanghai, China

Jan 2022 – Apr 2022

- **Data Analysis:** Utilised PySpark, SQL, and Python to efficiently query, process, clean, and analyse retail customer data from distributed database, collaborating with the client lead team to uncover insights and trends.

- **Ad-Hoc Query Tool Enhancement:** Updated and improved the team's ad-hoc query tool on GitLab, streamlining its functionality to support a wider range of ad-hoc requests. This update improved efficiency and ease of use for the team, facilitating quicker and more accurate data retrieval.
- **Targeted Customer Advertising System:** Contributed to developing a targeted customer advertising system using the Alternating Least Squares algorithm. Trained the AI model with customer preferences and engagement data to identify products for regaining and retaining customers with declining loyalty or infrequent engagement.

Projects

Personal Profile Website, Full-Stack Web Application

Melbourne, VIC, Australia

Jun 2024 – Present

- **Link:** tiantian-li.me
- **Project Overview:** Designed and developed a personal profile website to showcase my skills and projects.
- **Technologies Used:** MySQL, Java Spring Boot, RESTful API, React-TypeScript, AWS: RDS, EC2, S3, CloudFront, and Route 53.
- **Backend Implementation:** Developed a robust backend using Java Spring Boot, creating RESTful APIs hosted on an AWS EC2 instance to handle data transactions efficiently.
- **Frontend Development:** Built a responsive frontend using React with TypeScript, hosted on AWS S3, ensuring an optimal user experience across various devices.
- **Database Management:** Employed MySQL hosted on AWS RDS for database management, ensuring secure and efficient data storage and retrieval.
- **Testing:** Conducted unit tests and integration tests for the backend using JUnit, ensuring the reliability and robustness of the application.
- **Deployment:** Ensured reliable online accessibility and scalability by deploying the backend API on an AWS EC2 instance, the database on AWS RDS, and the frontend on AWS S3.
- **CI/CD Pipeline:** Utilised GitHub Actions to implement a CI/CD pipeline, automating the deployment process to continuously update website content.
- **Coding Principles:** Adhered to SOLID programming principles throughout the development, resulting in clean, maintainable, and scalable code that enhances future development and maintenance efforts.
- **Performance Optimisation:** Utilised AWS CloudFront CDN for frontend content delivery, ensuring high availability and low latency. Employed a Load Balancer to manage HTTPS traffic to the backend, leveraging AWS Certificate Manager for enhanced security.

Game of Ethics, Full-Stack Web Application

Melbourne, VIC, Australia

Mar 2023 – Jul 2023

- **Link:** <http://d28tzhn3mqh229.cloudfront.net>
- **Project Overview:** Engaged in developing a full-stack web app in a real industry setting, involving direct client communication.
- **Team Collaboration:** Worked in a team of five, utilising the MEVN stack (MongoDB, Express.js, Vue.js, Node.js) to create a game addressing ethical issues in the Airline industry.
- **Agile Methodology:** Involved in all Agile project phases: analysis, design, implementation, testing, management, and delivery.

- **Robust Login Function:** Developed a robust login feature using MongoDB, effectively preventing multi-login conflicts, ensuring seamless user experience and data integrity.
- **Re-Join Feature:** Implemented a re-join functionality allowing users to resume the game from their last state, significantly enhancing user engagement and satisfaction.
- **User Interface Enhancements:** Improved the user interface by integrating real-time online/offline status indicators and a customisable game progress timer with Bootstrap on the game creation page, contributing to a more interactive and user-friendly experience.
- **Project Management:** Managed project progress with Trello and documentation on Confluence, ensuring smooth team collaboration.
- **Delivery:** Presented the final version to the client, demonstrating project success and receiving positive feedback.

Education

University of Melbourne

Master of Information Technology (Specialisation in Artificial Intelligence) Feb 2021 – Jul 2023

- Relevant coursework: Internet Technologies, Algorithms and Complexity, Programming and Software Development (Java), Database Systems & Information Modelling, Cryptography and Security, Software Processes and Management, Security Analytics, Information Visualisation, and Spatial Data Management.
- Publication: Y. Xiang, **T. Li** (co-first author), W. Ren, T. Zhu, and K. K. R. Choo, “A lightweight privacy-preserving scheme using pixel block mixing for facial image classification in deep learning,” *Engineering Applications of Artificial Intelligence*, vol. 126, pp. 107180, 2023.

China University of Geosciences

Bachelor of Engineering (Major in Information Security) Sep 2016 – Jun 2020

- Relevant coursework: Program Design of C Language, Object-Oriented Program Design (C++), Security Program Design, Computer Network and Communication, Management of Software Project, Software Security, Data Structure, Design and Analysis of Algorithms, Network Security, Principle and Security of Database System, Principle and Security of Operating System, and Mathematical Modelling.
- Publication: **T. Li**, W. Ren, Y. Xiang, X. Zheng, T. Zhu, K. K. R. Choo, and G. Srivastava, “FAPS: A fair, autonomous and privacy-preserving scheme for big data exchange based on oblivious transfer, Ether cheque and smart contracts,” *Information Sciences*, vol. 544, pp. 469-484, 2021.

Awards

- **Meritorious Winner** of Mathematical Contest in Modeling (MCM), Apr 2019.
- **State-level First Prize** of Contemporary Undergraduate Mathematical Contest in Modeling (CUMCM), Dec 2018.
